

# BT-INSPECTOR

## Body Temperature Surveillance

### OVERVIEW:

The BT-Inspector is a plug & play system for non-contact body temperature surveillance. It combines a reliable industrial IR-Camera with an intelligent software for identity checks. The intuitive user interface does not require any prior knowledge.

The intelligent face recognition software allows the identification and tracking of a single person with an alleged higher body temperature\*. This is also possible when a group of people is monitored.

The stand-alone system is well-suited to easily and safely monitor entrances to businesses, hospitals, airports and such.

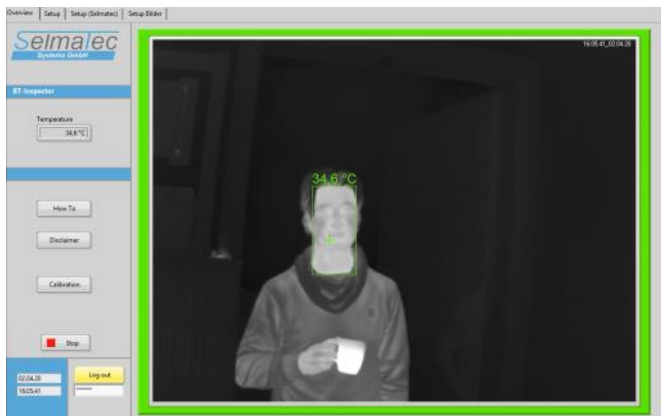

IMAGE WITH NORMAL TEMPERATURE

ALARM WITH HIGHER BODY TEMPERATURE

### ADVANTAGES:

- Easy installation process (plug & play)
- Intuitive user experience
- Compact and mobile
- Intelligent face recognition and tracking
- Alarm signal (visual and acoustic)
- Industrial IR-Camera

### DELIVERY CONTENTS:

- IR-Camera 320x240 Pixel (optional 640x480)
- BT-Inspector Software
- Panel PC (inkl. Monitor, Mouse & Keyboard)
- PoE Injector (1 wire camera connection)
- Tripod

### RETURN ON INVESTMENT:

This camera is an industrial IR-camera (measuring range -10...1200°C) that will be delivered with an additional extensive analytics software.

The "Industrial Software Suite Light" will be part of the package, therefore the system can also be used to monitor production or engineering processes.

Customers that buy the BT-Inspector will receive a 20% discount for the full version of the Industrial Software Suite.

\* This product is not suitable to diagnose an illness. It is a useful tool to monitor temperatures. The use of this system can not replace the examination of a medical doctor. The degree of an illness should not be assessed solely from temperature measurements. This system only provides measurements of surface temperatures (facial skin), these differ from the core temperature of the body.
